"0" is the past, "1" is the future, but "the present" is nowhere; this is an undeniable logic.

Open the eyes----- Among the countless parallel lines, I settle on "blasphemy" as my choice.

Doubting our very "existence", those sceneries reflected in your eyes are coming together and settling down.

I doubt you

Even the basic concept of time, denoted by clocks' two hands, is showing distortion at the observer's will.

There has to be an absolute boundary to the knowledge bestowed by God. It's an accident caused by foolishness, an uninvited miracle.

@Deleted User ***The rules and regulations of the locked Gate are no more.***

Please stop

you are confuse

Open the eyes----- With my hands extended toward the speed of light, the pulse of my memory plunges into an unfathomable logic.

Open the eyes----- The universe still holds hidden theories of chaotic disorder; these points, called infinite continuity, borrow the power of irregularity and "replay" again and again.
